

RAJKAMAL

Software Engineer

Pursuing a software development role in a reputable organization provides opportunities for personal and professional growth through innovation, collaboration, and working on complex projects, fostering technical expertise and a fulfilling career.

Work Experience

Software Engineer, IIIT BHOPAL

Feb/2025 -Ongoing

Key Responsibilities and Achievements

- Worked on the design and development of a Generative AI-enhanced conversational system for automated support and intelligent query handling.
- Developed LLM-powered chat workflows to provide context-aware, multi-turn responses for user support and simulated emergency communication scenarios.
- Implemented prompt engineering strategies and response validation mechanisms to ensure accurate, reliable, and safe AI-generated outputs.
- Built and integrated RESTful backend APIs using Node.js and Python to support real-time data retrieval and conversational logic.
- Applied data engineering practices for preprocessing user inputs, logging conversations, and improving response accuracy over iterations.
- Worked with AI model integration, deployment, and testing, ensuring scalability and low-latency responses on cloud environments.
- Contributed to concepts involving voice-based interaction and IVRS-style conversational systems, aligning AI responses with automated communication platforms.
- Followed complete SDLC practices, including requirement analysis, technical documentation, testing, and iterative feature enhancement.
- Collaborated with cross-functional teams while maintaining secure, maintainable, and production-ready codebases.

Technologies Used:

LLMs (Prompt Engineering), Python, Node.js, REST APIs, MongoDB, Cloud Platforms, Git, AI APIs

- Design and implement **RESTful APIs** and scalable backend architectures.
- Deploy and maintain applications on cloud platforms like **AWS, Vercel, Supabase**, and Firebase.
- Provided support for domain software applications, including development and management of existing applications on servers.
- Applied DevOps practices using Git, Docker, and CI/CD pipelines and managed the end-to-end SDLC from requirement analysis to deployment and maintenance.

Personal details

Languages Known

1. English
2. Hindi

Hobbies

1. Cricket and football
2. Chess
3. Reading books and Listening music

Technical Skills

1. Programming Language:

C++,C, Java, python

2. Data visualization Tools:

Tableau

3. Databases : MySQL ,

PostgreSQL, MongoDB

4. Excel (including advanced Excel and vba development)

5. Framework and Libraries:

Node js. ,React js. ,Angular

6. Other skills : Restful API's

Microservices ,Agile/Scrum,

Test Driven Development(TDD),

git version control

Core Competencies

-Project Management
-Requirement Analysis
-Product Enhancement
-Troubleshooting
-Software Development and life Cycle
-Data Structure and Algorithms
-Agile Methodologies

Soft skills

-Collaborator
-Communicator
-Analytical
-Quick Learner
-Problem Solver

System and Network Administrator

Govt. Engineering College,
Buxar ,Bihar

Jan 2024-Jan-2025

- Led the development of back-end operations, managed databases, and created APIs using advanced React js. and Node js. technologies to ensure project success.
- Conducted proactive troubleshooting and monitored project progress, swiftly addressing and resolving issues to maintain quality and timelines.
- Managed network and digital support services, including Internet, IP management, antivirus, and patch management.
- Implemented and maintained Web Application Firewall (WAF) for enhanced security.
- Enforced cybersecurity measures to protect organizational data and infrastructure.
- Administered VLAN, servers, switches, and website support operations.
- Developed new software applications and maintained existing applications on servers.
- Provided email support and troubleshooting services.
- Offered technical support for NIC video conferencing systems.
- Performed additional IT-related tasks as assigned.
- Updated and maintained documentation for both existing and updated features of THD, while managing effective client communication via email.
- Implemented MD5 hashing techniques, managed image database integrations, resolved CORS issues, and navigated challenges within the .NET framework.
- Designed and developed new APIs, ensuring adherence to established coding standards and best practices.

Certifications

- IoT(Internet of Things)
Wireless & Cloud Computing
Emerging Technologies
- Statistical Data Analytics for
Business Research | May 2020
VIT Online Learning Institute
(VITOL)
- Robotic Process Automation |
June 2020
GUVI

Trainings

**Raja Ramanna Centre for
Advanced Technology, Indore
June 2021 – July 2021**

- Developed a deep learning
CNN model to detect COVID-
related pulmonary
diseases using chest X-rays.
- Employed Google's pre-
trained model Inception and
achieved 94.6%
accuracy rate.

Internship Experince

Data Analytics Intern Cedar Management ltd.(Remote)

July 2023-Dec 2023

- Developed and executed SQL queries for data extraction and analysis, providing key insights and effective visualizations using Power BI.
- Managed servers remotely using Zoho Assist, ensuring seamless backup, updates, and efficient file management, including creating log files and removing unnecessary files.
- Automated repetitive tasks in Excel using VBA, significantly enhancing productivity and streamlining workflows.
- Designed and implemented custom Excel add-ins to simplify data analysis and reporting, making complex tasks more accessible for the team.
- Reduced bug incidence by 30% through the implementation of automated testing processes.
- Improved data processing efficiency by 30% by leveraging automation tools and techniques.
- Boosted sales by 15% by analyzing and targeting key customer segments using data-driven strategies.

Software Developer Intern GAO TEK Group.(Remote)

Mar 2023-May 2023

- Developed and executed SQL queries for data extraction and analysis, providing key insights and effective visualizations using Power BI.
- Managed servers remotely using Zoho Assist, ensuring seamless backup, updates, and efficient file management, including creating log files and removing unnecessary files.
- Automated repetitive tasks in Excel using VBA, significantly enhancing productivity and streamlining workflows.
- Designed and implemented custom Excel add-ins to simplify data analysis and reporting, making complex tasks more accessible for the team.
- Reduced bug incidence by 30% through the implementation of automated testing processes.
- Improved data processing efficiency by 30% by leveraging automation tools and techniques.
- Boosted sales by 15% by analyzing and targeting key customer segments using data-driven strategies.

Personal Projects

Personal Projects(Ecommerce Web-App)

link

- Developed a user-friendly e-commerce application supporting online transactions via REST API.
- Integrated real-time analytics for stock and asset management, visually represented using pie graphs.
- Designed and implemented sign-up and login pages with email verification for enhanced user authentication.
- Ensured smooth user experience through dynamic pages with intuitive navigation.
- Improved application performance by 25% through effective code optimization and refactoring.

Personal Projects(Movies Web-App)

link

- Designed and developed a dynamic movie application that fetches real-time data from a movie API.
- Implemented features like movie search, filtering by genre, and displaying detailed movie information, including ratings and reviews.
- Integrated a responsive UI/UX design for seamless navigation across devices, ensuring an engaging user experience.
- Utilized API data to showcase trending movies, upcoming releases, and personalized recommendations.
- Optimized API calls to ensure fast loading times and efficient data handling.
- Enabled user authentication for features like favorites and watchlists, enhancing user interaction and retention.
- Ensured code maintainability and scalability by following best practices in React.js, Node.js, and RESTful API integration.

Educations

Qualifications	Tenure	Board/University	CGPA/Percentage
B.Tech	2019-2023	VIT University	8.36
Intermediate	2017	CBSE	68.2
Matriculation	2015	CBSE	7.6
